At the 2011 meeting of the American Urologic Association, Urology Centers of Alabama's physician Dr. Brian S. Christine was appointed to the Board of Directors for the Society of Urologic Prosthetic Surgeons (SUPS).

The purpose of this Society is to advance, foster, encourage and promote the study and application of urological prosthetic surgery. Dr. Christine, Director of Erectile Restoration and Prosthetic Urology at Urology Centers of Alabama, has been a member of SUPS for a number of years. The elevation to the Board of Directors is doubly important, as Dr. Christine will now serve as one of the liaisons for SUPS in its interactions and association with the Sexual Medicine Society of North America (SMSNA).

These two groups, SUPS and SMSNA, represent the largest organizations for prosthetic urologists and physicians who specialize in sexual medicine. "I am tremendously pleased to be a member of the Board of Directors," says Dr. Christine. "My membership and association with SUPS and SMSNA have provided invaluable opportunities for me to broaden my knowledge and improve my surgical skills. Now, I hope to be directly involved with the growth of the societies and help elevate the field of urological prosthetic surgery to the highest state of innovation and resourcefulness which is critical to the advancement of the field as well as educating other urologists in the treatment of erectile dysfunction, male urinary incontinence, and Peyronie's disease."
